

AHS (222)

ALCOHOL HAND SANITISER

- **Rapid drying for speed of use**
- **Bactericidal and fungicidal**
- **Contains Trichlosan**

AHS is a rapid drying, non-rinse hand sanitiser designed to prevent the spread of contaminating organisms. It contains a minimum of 60% alcohol, which is proven to kill both gram negative and gram positive bacteria.

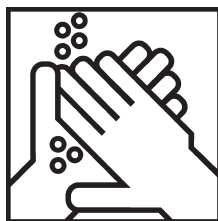

A viscous clear gel, AHS contains Triclosan, which is an effective, skin-friendly bactericide.

AHS is ideal for use in establishments where infection control is a priority, e.g. hospitals, care homes, clinics, high risk food manufacturing and preparation areas, etc.

DIRECTIONS

Apply to the skin and rub in covering the whole area. AHS dries rapidly while killing bacteria. Do not wash the product away or use material to dry the hands.

Use biocides safely. Always read the label and product information before use.
