

The Role of Fragrance

Clean, fresh washrooms give a clear message to customers, visitors, tenants and employees about the standards that are set for the establishment. A fresh, pleasant smell reinforces the fact that the washroom is clean and that you care about the safety and comfort of those who use your facilities.

At Technical Concepts we understand the complex harmony of the many and varied elements that make up each fragrance can be perceived differently by everyone who experiences them. Our unique and broad range of air fresheners has been developed to meet the diverse preferences of customers across the globe, using only the best quality fragrances.

To help you make your selection, we have grouped the air fresheners according to fragrance type and sub-type. *For example, a fragrance with predominantly citrus notes falls into the Citrus category, but the more delicate notes supporting the main fragrance may be floral or fruity, and these are the sub-categories.* Or, a fragrance in the Herbal category will have predominant notes of one herb, such as lavender, accompanied by subtle notes of another that determines the sub-category. *For example, Sweet Lavender is lavender enhanced by sweet vanilla, placing it in the Herbal Sweet category.*
